

SOUMYA RANJAN GHADEI

PROFESSIONAL SUMMARY

Accomplished SDET/QA Automation Engineer with expertise in high-performance automation frameworks, AI-driven test automation, and CI/CD integration. Skilled in Playwright, Selenium, API testing, and AI-powered tools for self-healing automation, and intelligent maintenance. Passionate about cloud-based testing and DevOps integration to optimize software quality. Proven ability to mentor teams, lead AI-assisted automation strategies, and collaborate cross-functionally for scalable test solutions. Recognized for innovation in automation, AI-based anomaly detection, and process improvements that enhance efficiency and reduce defect leakage. Experienced in collaborating with cross-functional teams to streamline testing processes, integrate automation into CI/CD pipelines, and support continuous delivery. Proven ability to drive process improvements, mentor teams, and contribute to the successful delivery of high-quality software products.

EXPERIENCE

SDET Engineer

Transunion | Bengaluru | June 2025 - Current

- Designed and maintained testing frameworks to streamline the QA process.
- Led modern test practice adoption and innovation across teams.
- Built agentic automation frameworks** using **Playwright** and **Selenium**, enabling AI agents to execute end-to-end user journeys from natural language prompts.
- Deployed **MCP servers** to bridge the gap between local testing tools and LLMs, providing the AI with real-time system context for deeper analysis.
- Optimized CI/CD pipelines** by orchestrating a hybrid approach of traditional Playwright scripts and AI-driven validation.
- Reduced "flakiness"** in automated suites by implementing AI-powered retry logic and environment state validation.
- Engineered sophisticated prompts** and RAG (Retrieval-Augmented Generation) workflows to generate high-coverage test data and edge-case scenarios.

Senior Project Engineer (SDET/Quality Assurance Engineer)

Wipro Pvt Ltd | Bengaluru, India | December 2024 - June 2025

- Developed and maintained scalable and reusable automation frameworks using Java and Selenium.
- Performed automated API testing using RestAssured, achieving 100% API coverage across key business modules, resulting in 30% faster defect detection.
- Integrated test automation into CI/CD pipelines using Bamboo, Bitbucket, GitHub, and SauceLabs.
- Guided a team of 5 junior engineers on best practices for test automation, increasing overall team productivity by 35% and reducing script maintenance time by 20%.
- Collaborated with cross-functional teams to define test objectives, creating comprehensive test plans that resulted in a 99% test case pass rate during production releases.
- Contributed to sprint planning, story grooming, and release planning by providing accurate testing effort estimates, leading to a 20% improvement in sprint predictability.
- Provided training and mentorship to junior QA engineers on automation best practices and effective framework usage.

[Bold Profile](#)

SKILLS

- Java
- Python
- ROBOT Framework
- Generative AI** (GPT-4/Claude), AI agents, prompt engineering, RAG
- Protocols and frameworks:** MCP (Model Context Protocol), Playwright, Selenium
- Testing:** self-healing automation, synthetic data generation, autonomous testing
- Rest assured
- Cucumber
- TestNG
- Maven
- Git
- Jira
- Bamboo
- Sauce Labs
- GitHub
- Postman
- Behavior-driven development
- Azure
- AWS
- GCP
- Docker / container
- CI/CD integration

EDUCATION

BSC.IST

Information Science and Telecommunication
Gangadhar Meher University,
Sambalpur, Odisha, India
GPA: 83%

January 2020

Intermediate

G M Junior College, Sambalpur,
Odisha, India

- Conducted knowledge-sharing sessions and participated in code reviews to maintain the quality and scalability of automated scripts.
- Wipro is a leading global information technology, consulting, and business process services company.

Software Trainee (SDET/Quality Assurance Engineer)

Wipro Pvt Ltd | Bangalore, India | February 2021 - November 2024

- Delivered many quality features to salesforce application.
- Helped in improvement in salesforce flow and user experience for client.
- Authored feature files using Cucumber with Gherkin language, enabling better collaboration between development, QA, and business stakeholders.
- Created end-to-end test automation suites for web applications, increasing test coverage by 85% and reducing critical production issues by 40%.
- Identified, Logged, and Tracked over 200 bugs using JIRA, collaborating with developers to achieve a 95% defect closure rate within the sprint cycle.
- Developed a comprehensive framework using Playwright and integrated it successfully into a CI/CD pipeline.
- Utilized tools such as Jenkins on an Amazon EC2 instance and incorporated extensive logging and exception handling.
- Wipro is a leading global information technology, consulting, and business process services company.
